Test Case Document

TheBloggerByte.com — Stories for curious lives

Project: TheBloggerByte Website & CMS

Prepared by: QA / SQA Team

Document version: v1.0

Date: 2025

Environment: Staging / Production

Tools: Manual Testing (In Progress)

1. Navigation & Links Testing

1.1 Navigation

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-N01	Homepage loads	1. Open https://thebloggerbyte.com 2. Observe page	Page loads within 3 seconds, no console errors	High	Verified
TC-N02	Logo link	1. Click site logo from any page	Redirects to homepage	High	Verified
TC-N03	Main nav links	1. Click each nav menu item one by one	Each link opens the correct page without 404	High	Verified
TC-N04	Broken links check	1. Browse all key pages 2. Click all visible links	No 404 or dead links found	High	Verified
TC-N05	Footer links	1. Scroll to footer 2. Click each link	All footer links open correct destinations	Medium	Verified
TC-N06	Back navigation	1. Navigate to an article 2. Click browser back button	Returns to correct previous page	Medium	Verified

2. Blog Listing & Article Page

2.1 Blog & Article

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-B01	Blog listing loads	1. Navigate to blog/articles section	Articles display with title, thumbnail, date, excerpt	High	Verified
TC-B02	Article opens correctly	1. Click any article card	Full article page opens with correct title, body, author, date	High	Verified
TC-B03	Article images load	1. Open any article with images	All images load, no broken image icons	High	Verified
TC-B04	Pagination / infinite scroll	1. Scroll to bottom or click Next page	Loads next set of articles correctly	Medium	Verified
TC-B05	Category filter	1. Click a category tag	Only articles of that category are shown	High	Verified
TC-B06	Tags filter	1. Click a tag on any article	Articles filtered correctly by that tag	Medium	Not working
TC-B07	Article URL is clean	1. Open any article 2. Check URL in browser	URL is readable slug, no query string garbage	Low	Verified
TC-B08	Related articles	1. Scroll to bottom of an article	Related articles section shows relevant content	Low	Verified
TC-B09	Read time indicator	1. Open a long article	Estimated read time displayed correctly	Low	Verified

3. Search Functionality

3.1 Search

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-S01	Valid search returns results	1. Enter a known keyword in search 2. Press Enter or click search icon	Relevant articles appear in results	High	Failed
TC-S02	Empty search	1. Click search without entering text 2. Submit	No crash; shows empty state or prompt message	High	Not working
TC-S03	No results found	1. Search for a random string e.g. "xyzabc123"	Friendly "no results" message shown, no error	Medium	Verified
TC-S04	Special characters in search	1. Enter <!@#$%> in search field 2. Submit	Page does not crash; handled gracefully	High	Verified
TC-S05	Search result links work	1. Perform a valid search 2. Click a result	Opens correct article page	High	Verified
TC-S06	Search is case-insensitive	1. Search "FOOD" 2. Search "food"	Both return same or similar results	Medium	Verified

4. Forms & Subscription

4.1 Forms

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-F01	Newsletter subscribe — valid email	1. Enter valid email in subscribe form 2. Click Subscribe	Success message shown, no page error	High	Verified
TC-F02	Newsletter — invalid email	1. Enter "notanemail" 2. Click Subscribe	Validation error shown, form not submitted	High	Pending
TC-F03	Newsletter — empty submission	1. Leave email blank 2. Click Subscribe	Error message: field is required	High	Pending
TC-F04	Newsletter — duplicate email	1. Subscribe same email twice	Appropriate message shown (already subscribed or success)	Medium	Pending
TC-F05	Contact form — valid submission	1. Fill all fields with valid data 2. Submit	Success confirmation shown	High	Pending
TC-F06	Contact form — missing required fields	1. Leave required fields blank 2. Submit	Validation highlights empty fields	High	Pending
TC-F07	Comment form (if available)	1. Submit a comment on an article	Comment appears or pending-moderation message shown	Medium	Pending

5. UI, Visual & Responsive Testing

5.1 UI & Responsive

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-U01	Mobile layout (375px)	1. Open site on mobile or resize browser to 375px	Layout adjusts; no content overflow or overlap	High	Verified
TC-U02	Tablet layout (768px)	1. Open site at 768px width	Layout adapts correctly for tablet view	High	Verified
TC-U03	Desktop layout (1280px+)	1. Open on desktop browser	Full layout renders with no alignment issues	High	Verified
TC-U04	Cross-browser — Chrome	1. Open site in Google Chrome	Renders correctly	High	Verified
TC-U05	Cross-browser — Firefox	1. Open site in Firefox	Renders correctly	High	Verified
TC-U06	Cross-browser — Safari	1. Open site in Safari	Renders correctly	Medium	Verified
TC-U07	Cross-browser — Edge	1. Open site in Edge	Renders correctly	Medium	Verified
TC-U08	No broken images	1. Browse all major pages	No broken image icons anywhere on site	High	Verified
TC-U09	Fonts load correctly	1. Open any page	Custom fonts render, no fallback flash	Medium	Verified
TC-U10	Hamburger menu (mobile)	1. On mobile view, tap hamburger icon	Navigation menu opens and closes correctly	High	No hamburger menu

6. Performance & SEO

6.1 Performance & SEO

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-P01	Homepage load time	1. Run Google PageSpeed Insights on homepage	Score >= 70 on mobile, >= 85 on desktop	High	Verified
TC-P02	Article page load time	1. Run PageSpeed on a long article	Loads in under 3 seconds on average connection	High	Verified
TC-P03	Core Web Vitals - LCP	1. Check PageSpeed report	LCP (Largest Contentful Paint) under 2.5s	High	Verified
TC-P04	Core Web Vitals - CLS	1. Check PageSpeed report	CLS (Cumulative Layout Shift) under 0.1	Medium	Pending
TC-P05	Meta title present	1. View page source or use SEO tool 2. Check each key page	<title> tag present and unique per page	High	Pending
TC-P06	Meta description present	1. View source on key pages	Meta description filled, under 160 characters	High	Pending
TC-P07	Heading hierarchy	1. Inspect article page HTML	Single H1 per page; H2s and H3s used correctly	Medium	Pending
TC-P08	Image alt text	1. Inspect images on article pages	All <img> tags have descriptive alt text	Medium	Pending

TC-P09	HTTPS enforced	1. Type http://thebloggerbyte.com in browser	Auto-redirects to https://	High	Pending
TC-P10	Sitemap accessible	1. Visit /sitemap.xml	Sitemap loads and contains main URLs	Medium	Pending

7. CMS — Content Management Testing

7.1 CMS Content Management

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-C01	CMS login — valid credentials	1. Go to CMS login URL 2. Enter valid username & password	Successfully logged into CMS dashboard	High	Pending
TC-C02	CMS login — invalid credentials	1. Enter wrong password 2. Submit	Error message shown; access denied	High	Pending
TC-C03	Create and publish new post	1. Create new post with title, body, image 2. Click Publish	Post appears on frontend within 60 seconds	High	Pending
TC-C04	Draft post not visible on frontend	1. Save post as Draft (do not publish)	Draft does NOT appear on public website	High	Pending
TC-C05	Edit published post	1. Open a published post in CMS 2. Edit title and body 3. Save	Changes reflect on frontend after save/publish	High	Pending
TC-C06	Schedule a post	1. Create post 2. Set future publish date & time 3. Save	Post goes live at exact scheduled time, not before	High	Pending
TC-C07	Delete a post	1. Delete a published post from CMS	Post removed from frontend; URL returns 404	High	Pending
TC-C08	404 page for deleted post	1. Visit URL of a deleted post	Custom 404 page shown — not a server error	High	Pending
TC-C09	Image upload in CMS	1. Upload image in media library	Image uploads, thumbnail generates, usable in posts	High	Pending
TC-C10	Assign category to post	1. Create post 2. Assign a category 3. Publish	Post appears under correct category on frontend	Medium	Pending
TC-C11	Assign tags to post	1. Create post 2. Add 3 tags 3. Publish	Tags display on article and filter works correctly	Medium	Pending
TC-C12	Remove tag from post	1. Edit published post 2. Remove a tag 3. Save	Tag no longer appears on article page	Medium	Pending
TC-C13	SEO fields in CMS	1. Edit post in CMS 2. Fill SEO title & meta description 3. Publish	Meta data renders correctly in page source	High	Pending
TC-C14	CMS logout	1. Click logout in CMS	Session ends; redirected to login page	High	Pending
TC-C15	Session expiry	1. Leave CMS idle for session timeout period	Automatically logged out; cannot access without re-login	Medium	Pending

8. User Roles & Permissions

8.1 Roles & Permissions

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-R01	Admin can access all CMS areas	1. Log in as Admin	Access to all menus: posts, pages, users, settings	**High**	**Pending**
TC-R02	Editor cannot access user management	1. Log in as Editor role	User management section not visible or accessible	**High**	**Pending**
TC-R03	Author sees only own posts	1. Log in as Author	Only own posts visible in post list	**High**	**Pending**
TC-R04	Author cannot delete other posts	1. Log in as Author 2. Try to delete another author's post	Action blocked; permission denied message	**High**	**Pending**
TC-R05	Unauthorized CMS access attempt	1. Try to access /wp-admin or CMS URL without login	Redirected to login page, not granted access	**High**	**Pending**
TC-R06	Password reset flow	1. Click Forgot Password on CMS login 2. Enter email	Reset email received; link works and allows password change	**High**	**Pending**

9. Security Testing

9.1 Security

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-SEC01	XSS in search field	1. Enter <script>alert(1)</script> in search 2. Submit	Script does not execute; input sanitized	**High**	**Pending**
TC-SEC02	XSS in comment field	1. Enter <script>alert(1)</script> in comment 2. Submit	Script not executed on page render	**High**	**Pending**
TC-SEC03	SQL injection in search	1. Enter ' OR 1=1-- in search field	No database error exposed; handled gracefully	**High**	**Pending**
TC-SEC04	HTTPS on all pages	1. Navigate through all main pages	All pages served over HTTPS (padlock shown)	**High**	**Pending**
TC-SEC05	Sensitive URLs not public	1. Try accessing /wp-admin, /phpmyadmin, /.env	Returns 403, 404, or redirects to login — not exposed	**High**	**Pending**
TC-SEC06	Login brute force protection	1. Enter wrong password 10+ times	Account locked or CAPTCHA triggered	**High**	**Pending**
TC-SEC07	No sensitive data in page source	1. View source of any page	No passwords, API keys, or internal paths visible	**High**	**Pending**

10. Regression Testing

10.1 Regression

TC ID	Test Scenario	Test Steps	Expected Result	Priority	Status
TC-REG01	Regression after CMS update	1. After any CMS/plugin update 2. Re-run TC-N01 to TC-B09	All previously passing tests still pass	**High**	**Pending**
TC-REG02	Regression after theme change	1. After theme update 2. Re-run UI test cases	No visual regressions introduced	**High**	**Pending**
TC-REG03	Regression after new post published	1. Publish a new post 2. Check homepage, listing, category pages	New post appears correctly; existing content unaffected	**Medium**	**Pending**

Appendix — Legend & Status Definitions

Status

Value	Meaning
Pending	Test not yet executed
Pass	Test executed and passed
Fail	Test executed and failed — raise a bug
Blocked	Cannot execute — dependency or environment issue

Priority

Value	Meaning
High	Must pass before release — core functionality
Medium	Should pass — important but not blocking
Low	Nice to have — execute when time permits
